

VIVEK BABU

SOFTWARE DEVELOPER

📧 github.com/Vvk0105 | ✉ vivekbabu0105@gmail.com | ☎ +91 7306533356

Highly motivated and detail-oriented software engineer with hands-on experience in Python, Django, and React. Eager to leverage my skills in coding, problem-solving, and collaboration to contribute to innovative projects. Passionate about continuous learning and delivering impactful solutions through creativity and technology.

SKILLS

Python	DRF	HTML	Tailwind	Sql
Django	React	CSS	Bootstrap	Git

PROJECTS

- **AI Interview Bot** : AI Interview Bot is a web app built with Python (Django) and React, where users can log in, upload resumes, view relevant job listings, and apply for jobs. It also features AI-generated interview questions using ML (handled separately). I developed the frontend and backend, including user auth, resume handling, job matching, and interview flow integration.
- **Pen Craft** : Pencraft is a web-based platform built with Django that allows users to upload written content such as novels, articles, and stories for expert evaluation. Master writers review and grade the submissions, with machine learning (integrated externally) supporting content analysis. I developed the core functionality including content upload, grading system, expert review workflows, and a dynamic homepage section to highlight the top-rated submissions.
- **Netflix Clone** : Netflix Clone is a web application built using React, replicating the core UI and functionality of the Netflix platform. It features a responsive and interactive interface with dynamic movie browsing powered by the TMDB API. I developed the complete frontend, implemented user authentication and data storage using Firebase, and integrated API calls to display trending content, genres, and trailers, creating a seamless streaming-like experience.

EXPERIENCE

Srishti Innovative

July 2024 - Present

- Worked as a full-stack developer with a focus on Python (Django) for backend development and React for frontend support. Contributed to building and maintaining web applications, implementing REST APIs, managing databases, and enhancing UI components. Collaborated with cross-functional teams to deliver scalable, responsive solutions.

EDUCATION

Masters of Computer Application (MCA)

2022-2024

- SCMS School of Technology and Management

Bachelor of Computer Application (BCA)

2019-2022

- Parumala Mar Gregorios College Thiruvalla

ADDITIONAL INFORMATION

- **Languages:** English, Malayalam.
- **Certifications:** Python Data Science Certification – NPTEL (Completed: February 2024)
